○ Nurse Practitioner Midwifery Educator Programme

Are you looking to enhance your career in midwifery? Join Fernandez Foundation's **Nurse Practitioner Midwifery Educator Programme (NPME)** in collaboration with the Government of India. Become a Midwifery Educator equipped with midwifery principles and respectful maternity care in the maternal and newborn healthcare.

○ Who is a Nurse Practitioner Midwifery Educator (NPME)?

A NPM Educator blends evidence-based midwifery knowledge with clinical expertise to mentor compassionate and confident midwives. They champion change through advocacy, critical thinking, and collaboration shaping culturally sensitive professionals to global standards. Armed with their midwifery experience, their valuable inputs guide curriculum development reflecting the latest practices.

Why Choose this Programme?

Make an impact as a NPME at a National Midwifery Training Institute, established in line with International Confederation of Midwives (ICM) standards.

- **Expert Faculty**
Learn from international midwifery educators (IMEs) and national midwifery educators (NMEs)
- **Comprehensive Modules**
Theory and practical lessons to mould confident midwives
- **WHO Standards**
Workshops on Obstetric emergencies, simulation and research
- **Interactive Learning**
Team discussions, critical thinking exercises, case-based learning, etc.
- **Innovative Curriculum**
Pre-conception, postnatal to newborn care, legalities and ethics
- **Administrative Expertise**
Leadership techniques and standard management protocols
- **Clinical Training***
Rotation in Midwifery clinics, Triage, Obstetric-led unit, High-dependency unit in collaboration with childbirth educators, doulas, lactation counsellors, etc.
- **Additional Guidance**
Micro teachings, case presentations, SBAR communication, online learning avenues for continuous development, etc.

*Clinical training at Fernandez Hospitals and at public healthcare facility.

Programme Highlights

- Mentoring and assessment by a team of IMEs/ NMEs at each site
- Evidence-based teamwork between midwives and obstetricians in varied clinical settings
- Enhance skills in teaching, mentorship, reflection, assessment, learner development plans, leadership and advocacy
